(Report Mortalities Associated with Permitted Pond Solutions or Structures on Front of Form)

Remarks:

The reported numbers include incidentals, CIC inspector finds, Stantec monthly mortality survey finds, and any finds by GBBO.

GBBO also reported the following mortalities outside of the facility (buffer zone): 2 horned lark, 1 European starling, 2 mourning dove, 1 red-necked phalarope, and 1 unknown mammal species.

The following injured birds were also found within the facility: 1 Lewis' finch and 1 tree swallow.

Please comment on any circumstances which you feel may be important, particularly when you feel one or more mortalities may have occurred under unusual conditions.
